**Exam** : **000-N20**

**Title** : IBM Rational Enterprise  
Modernization Technical  
Sales Mastery Test v1

**Vendors** : IBM

**Version** : DEMO

NO.1 An enterprise organization manages their mainframe application development separately from

their projects on other platforms. Their processes and tools are disconnected, often resulting in delayed time to market. Which component of the IBM Integrated Solution for System z Development provides a common infrastructure for source control and change management?

- A. Rational Developer for System z
- B. Rational Quality Manager
- C. Rational Requirements Composer
- D. Rational Team Concert

Answer: D

NO.2 What is the purpose of the CICS Service Component Architecture capabilities of IBM Rational Developer for System z?

- A. to develop of a comprehensive web service that collects and processes data from multiple sources
- B. to offload development MIPS from the production server to a virtual z/OS environment on an x86 Linux server
- C. to manage application components that provide a common programming interface for service invocation
- D. to support multi-platform development with common tools for z/OS,Windows,UNIX,and Linux

Answer: C

NO.3 A customer wants to simplify the process of connecting their traditional mainframe applications

with Web 2.0 front-ends. Which feature of IBM Rational Developer for System z best meets their needs?

- A. EGL
- B. CICS Service Flow
- C. Service Component Architecture
- D. Unit Test

Answer: A

NO.4 Which statement is true about logical partitions (LPARs) in z/OS?

- A. Each LPAR must have a dedicated processor.
- B. Multiple small machines are more cost effective than a single large machine with multiple LPARs.
- C. Each LPAR must have a dedicated disk device.
- D. Each LPAR runs its own operating system.

Answer: D

NO.5 What are two ways snapshots are used in Rational Team Concert? (Choose two.)

- A. to capture the current state of a project plan
- B. to preserve the source code used for a given build
- C. to provide atomic changes to sets of files

D. to show the amount of source control activity that happened over a given time

Answer: A,B

NO.6 Which feature of IBM Rational Developer for System z reduces host CPU usage by requiring fewer

program compiles on z/OS?

- A. SCA tooling
- B. workstation syntax checking
- C. integrated business development language
- D. CICS Service Flow Modeler

Answer: B

NO.7 What are two IBM software products packaged with z/OS in the IBM Rational Development and

Test Environment for System z? (Choose two.)

- A. JBoss Application Server
- B. CICS Transaction Server
- C. WebSphere Application Server
- D. Cognos BI for Linux on System z

Answer: B,C

NO.8 What are two drawbacks to ISPF green screen tools for mainframe application development? (Choose two.)

- A. inability to connect remotely to the mainframe
- B. inability to create cross-platform projects
- C. unappealing user interface
- D. no support for multiple users

Answer: B,C

NO.9 A customer wants the most comprehensive view of their asset information with the ability to drill

down to the desired level of detail. Which IBM Rational Asset Analyzer interface should they use?

- A. RESTful
- B. ISPF client
- C. Eclipse plug-in
- D. browser-based

Answer: D

NO.10 Which benefit do customers receive by adding Rational Business Developer to the Integrated Solution for System z Development?

- A. personal z/OS testing environment for small-scale development
- B. optimized Java development for IBM middleware
- C. simplified development of Web 2.0 and SOA applications without Java language skills
- D. quickly transform green screen applications into web or mobile device interfaces

Answer: C
